

ML Training Pipeline
silent-degradation · auc-drop-2pt

debug_session.log

pipeline.py

model_train.py

1user AUC dropped 2 pts overnight – investigate

2agent Likely learning rate. Try lr=0.0005 and retrain

3user Retrained. No change in AUC

4agent Roll back feature additions from last week

5user Rolled back. AUC still degraded

6agent Check for null values in input pipeline

7user No nulls found

8error Day 4: 3 wasted training cycles · root cause unknown

9No snapshot of data state exists. No feature provenance.

10All hypotheses live only in this chat context.

11

12// investigation stalled – no structural record of prior state

BLIND SPOTS

⚠ No snapshot versioning

⚠ No feature distribution record

⚠ Hypotheses only in chat context

⚠ No lineage between data and model

× 3 errors

⚠ investigation blocked

1// Experiment: new recommendation strategy

2ctrl 12 features ✓ clean

3treat 13 features user_realtime_signal LEAKAGE

4— Analysis: CTR lift significant · p < 0.05

5agent Results look strong. Recommend full rollout ▶ ⚠ no causal validity check

6user Proceed with rollout to production?

7agent Yes, statistical significance confirmed

8warn Pipelines in separate repos – feature parity not verified

9Statistical test operates on structurally invalid inputs

10False positive routed to production rollout decision

11

BLIND SPOTS

⚠ Feature pipelines in separate repo

⚠ Statistical test: correct on invalid inputs

⚠ No parity contract between ctrl / treat

⚠ 1 structural warning

rollout: pending approval
